The only Temple of The Most High

The Only Temple of the Most High is the seventh pillar of the Order of Guardians of God's will on Earth.

It is a demonstration of the Triune God's will, whose wish is to have only one temple on the Earth for the Order.

The way of the Order of Guardians of God's Will on Earth embodies three developing phases.

The first phase:

- is characterized by development and spreading of the pillars of the Order with inclusion of all references and amendments.

The second phase:

- begins with construction of the Order's home, which will temporarily fulfill all needs of the Order in that time.

The third phase:

- begins with construction of The Only Temple of The Most High. By this the seventh pillar of the Order gets its form and the developing way of the Order its culmination.

The foundation of this temple has a form of the Order's star, whose one tip points to the East.

The centre of the star forms a regular hexagon on whose perimeter are six tracts in a form of equilateral triangles. Every side of the hexagon and tracts measures 49 meters. Both front side tracts and the middle back tract are 21 meters high and they carry triangular seven floor towers with the total height of 49 meters.

The front middle tract is 28 meters high with main gates into the temple on the ground floor and on the highest floor, there is a gallery with a mighty organ and room for musicians and a choir.

The backside tracts are 21 meters high and have no superstructure. The emblem of the Order has a diameter of 21 meters and is placed above the front tract of the building. Otherwise the building has a simple and smooth surface without any useless additions and embellishments.

The Only Temple of The Most High is divided according to its purpose into a temple place, ceremonial place and workspaces.

Temple place

The temple place occupies the middle hexagonal part of the temple and a part of the three front tracts.

Its sides meet in the back tract of the building, which forms a ceremonial place, so it is well seen from each seat of the temple's place. Here and on the galleries are 6200 seats for the temple's visitors.

On the walls that meet together in the ceremonial place are symbolically depicted two beings from the Highest board, in a superhuman size. There are no other paintings or statues in the temple. The shield of the Order spreads above the whole width of the ceremonial place in its colours on a green base.

This site always shines, either by natural or artificial light.

Ceremonial place

The ceremonial place in the tract of the building that heads to the East is divided into three levels.

The first level is formed by an area in front of the stairs of the ceremonial place, which is separated from the temple place by kneelers for the attendees. On both sides of the first level are ceremonial stools.

35 stairs lead to a second level, where on one side stands a ceremonial stool with an appliance to induce smell delightful to God and on the other side is a table used for purification. On both sides are removable seats. Another 14 stairs lead to the third and highest level of the ceremonial place, where there in the middle is a sacrificial stool and beside it large three armed candelabra.

In background and on sides of the ceremonial place are seven pillars with the profile of the Order's star in arched arrangement and behind them is a blue curtain, which encloses the ceremonial place.

Workspaces

All other rooms, except the temple and the ceremonial place serve on one hand for maintenance and operation of the temple, on the other for educational and ruling services of collective organs of the Order.
