# The Teaching of the Truth

## The Creation of the World and the Human Being

In the beginning there was only God, eternal and infinite and therefore everywhere attendant. No one created him, and He is alone. He is from Himself, all ages, without beginning and end, having any transformation, as He is almighty.

God, who is a Primal substance of all, penetrates the infinite universe. His spirit radiates an inexhaustible energy, which according to the Creator's laws, changes to different forms of masses, either visible or invisible to us.

Therefore the Spirit of the Highest God is created for all ages now and for the future.

God is unchanging and eternal. He is the unperceivable beginning and the final cause of all consequences, which become the causes of other consequences without end.

It is a circle of eternal transformation and with every beginning there is an end, as with every end is born a beginning.

It is an eternal circulation of God's creation without exception. It is based on the existence of the whole universe.

Every star formed in this universe owns its personal spark of that Light, coming out from the centre of the universe and it shines in the reflection of this light by its life-giving beams of rays to the space reserved to it by the law.

One from a large number of sparks, coming out from the centre of the cosmos, gave life to a primal cluster of particles and so it flashed in that infinite a new star, our sun.

From it arose the Solar system, because its creation was in motion like everywhere and everything in universe, according to laws, which God inserted to the mass and by evolution it has acquired form, having today.

Sun, like a star, twinkled long before the planets existed, because every planet comes from a star.

They willfully detached from mother's star and wanted to be independent, in an effort to be itself life giving.

It was an act of pride and vanity, but God in His wisdom and grace changed their failure in an act, which prospers us as a whole.

The planet, as an independent part was unable to keep the spark, which is still present in mother's star, and therefore it is dead.

Our sun, which is for our planet a life-giving celestial body, is for us a symbol of divine light, thereby, that God gives light to all, and that it wouldn't exist without him in the whole universe, so like without sun, the life wouldn't exist on our earth.

In run of evolution, according to strict laws, which God inserted into the mass, the earth is in the state of being in which it is currently found. By power of God's spirit, went out of water life on earth and evolved itself according to His laws the way, how we largely know it today.

In a manner that God created angels and other supernatural beings to his celebration and service, He also created a spiritual human, whose essence is a divine spark, created from seat

of the Highest and for its next existence took upon himself soul with spirit and finally astral robes.

This spiritual human being, unburdened by physical shroud, has observed evolution on our earth and of course all concerned with animals.

A thought was born in him, which was expressed by desire for sensual bodily pleasures.

In view of the fact that he did not have any bodily senses like the animals on earth, he couldn't have desire for lust, or could not imagine what feeling animal has during multiplication or at receiving food, simply everything related to the senses of the animal's body.

It was the wish of the spiritual human to find out what are physical pleasures that caused his fall into the body on our earth.

He craved the knowledge of lust and God in His kindness gave him the possibility.

He anticipated future development of the spiritual human and therefore divided his soul, while still at astral, into two parts, and the stronger part incarnated itself on Earth.

God herewith created the first man, because the man appeared on our planet not as a result of evolution, like the animals, flora and minerals, but by a first hand intervention of God, quite a new creature appeared on our earth.

This creature looked like something we cannot well imagine, however it was similar to our body with the only difference that his body was so noble and beautiful due to irradiation with goodness, that our eyes cannot visualize it.

We must not forget that the spiritual human has not committed any sin as yet, because he only wanted to experience feeling of the physical body using senses, which was a big decline, but not a sin.

First man on earth lived in paradise and handled nature by his spiritual force in such a way, that it was not necessary to care for it in order to provide his food and that of the animals found there.

However he searched in vain among the animals for an equal creature, that would be his aid.

Only after creation of a woman, recognized the human-man addition to his whole, acknowledged the second part of his soul, because his ability to understand astral laws was still immense.

First human couple had everything granted from the Creator, it means, they could fully use their senses; but one was not allowed.

God forbade them to eat from the tree of knowledge of good and evil, which was found in paradise, because eating its fruit would have removed the veil, which covered sense of good and evil.

They ate fruit from the tree of life in paradise, because it was necessary in order to the law of time to soften it to such a degree, that for us the first people in paradise would be eternal. If they did not stumble, they would still be alive in paradise, as the only human soul.

The second part of men's soul, his woman, had almost the same appearance and the same abilities of spirit, only in reduced scale.

Evil used the snake to seduce the woman, who was able to talk with any animal, because supernatural beings frequently used bodies of the animals to talk to her, and therefore when the snake talked, she was not surprised.

She let herself to be persuaded to eat fruit from the tree of knowledge of good and evil; she wanted to experience her feelings and consequences of her act.

When the man also did not resist and ate fruit from the tree of knowledge of good and evil, they became aware of their nakedness and felt longing for bodily connection.

However, this did not occur in paradise, since fear that came with guilty conscience was stronger than longing. They sensed that God wished to reveal Himself to them and therefore they were in hiding to avoid looking into His face, they were aware of how impossible was their action.

God then, after violation of His laws, put a spell on nature and established laws, as we know them today.

Because of the people's act, the tree of knowledge of good and evil and the tree of life, along with whole paradise were destroyed.

In the heart of the human couple now reigned fire of passion, which God found unpleasant.

As a result their external look changed, good qualities and astral powers left them, therefore body had to change because of this and took on the look that is known to us today.

Only now recognized man his woman and what began as a wish of the spiritual human before incarnation came true.

## **The Law of the Truth**

God is the ethereal being; therefore His seat in the centre of the universe is absolutely immaterial.

Next to the seat of the Highest is the least substantial sphere – the empire of the supernatural beings.

Here stay the supernatural beings of good and purified souls of the deceased, who wait to unite with God.

A safeguarding zone – the sphere of the green glare, surrounds this sphere.

Thereafter is an astral sphere, where you already find substantial orbs with a surface settled by creatures that possess spark of the Creator, same as we have.

The astral sphere is connected to the purgatory sphere that transits into the lowest sphere – hellish.

This is destined to the prince of dark and his helpers and to those souls of the deceased, who forever lost their heavenly delight.

The last sphere in order is the terrestrial sphere.

It includes all substantial orbs that are settled by beings, which have spark, soul and spirit, same as the people.

This sphere passes through all other spheres, from the lowest one to the border of the green glare sphere.

Every substantial sphere is further divided into seven degrees, whereas the first degree is the lowest and seventh is the highest.

Our Earth, which is located in the astral sphere, is subjected to the law of the Truth, that is part of the great astral law.

The Law of the Truth is a complex of laws for the alive and lifeless mass, visible and invisible, that is valid for our planet.

What is valid for our Earth is not valid for other substantial orbs, because in the universe, nothing is the same.

Astral law is valid for our whole sphere, which contains all partial laws of different configuration and forms of mass.

Other spheres have different laws and all are associated in the highest law of mass, law of cause and consequence.

God is perfection and fairness Himself; therefore His law is the most perfect and fair.

God is almighty and there is nothing in the world and in the universe that could even partially compare to our Creator.

Nothing is so powerful, that wouldn't be worthless and small in front of God's face.

Every being and every creature, thinking and unthinking, every material configuration, fulfils the law and will of his Creator, because His will, ageless and eternal is unshakable and any force cannot disturb or change it.

Even if all the heavenly army has revolted against its Creator, it would be thrown down by one breath of the Highest to a place of no return to the light spheres of the universe.

Even there it should fulfil the will of God, because evil is inferior to good and God is an infinite Good.

Everything, what God created is material, only the Highest Himself is immaterial.

The mass is softer more closely to the seat of the Highest, whereas the further from the highest sphere, we can find more rough mass.

Our imperfect sight can only see a rough mass; therefore we are unable to see many-sided and countless configurations of the soft mass around us, in the forms of beings, creatures or other forms of the spiritual mass.

We can only see the rough mass of a star in the form of the huge energy accumulation, but we cannot see the spark of the Creator, nor the being He gave life to – the spirit of the star, who again implicates the existence of the mass configuration of the cosmic orb.

The spirit of the star, since he is a reflection and product of God's spirit, forms beings in a certain radius, where his power is active, that are dependent on life-giving energy of the star's spirit.

Every star being material is subjected to the law of time, and therefore it slowly grows old as we do, however different timetable applies to it.

Every star will once face death, because its spark will return to its Creator, the spirit of the star will die, the star will dwindle and cease to be a life-giving orb.

At the same time, everything that was created by the spirit of the star will die.

Then a new spark will bring a new star to life, and by its spirit it will become a new life-giving force.

That's how it is in the universe, death and rebirth, and this cycle will be kept forever.

The spirit of the sun, who created beings that not only caused development of our Earth according to divine laws, but also take care of rise, growth and extinction of all sorts of plants on our planet, affects our Earth.

They are the spirits of minerals and plants, beings, who govern all events in our nature according to the age-old divine laws, inserted into the living and lifeless mass by the Creator.

Beings populating our planet also draw from the force of the solar spirit, because bodily shell of the animals and people could not exist without it.

Body of an animal is brought to life by God's life impulse in a form of animal soul without spirit, whereas human being by a divine spark with soul and spirit, therefore human being resembles God's shape.

The spirit of a human being, which is illuminated by the spirit of the Highest God, enables formation of thoughts and doing of acts according to a free will of each individual.

Because of his spirit, the human being can decide, whether he will step forward on a way of good or on a way of evil.

The animal, which does not have a spirit, acts by an instinct only, without independent thought process. The animal and the human being are both created by God, but the human being is similar to God and that is what separates a human being from the animal, since the beginning of his existence on Earth.

The astral sphere is for us people a mirror of our thoughts and acts, because every thought and act will transform itself into a creature of a certain shape in the part of the astral sphere destined to it.

According to the nature of our thought and act, a creature is created that is either good or bad and then they influence development of our earthly life accordingly.

Because according to the law of cause and consequence, every good cause has only a good consequence and bad cause only a bad consequence.

Every creature created by our thoughts and acts lasts as long as the human being that created it, until he fulfills his life duty.

This is destined for the human being in the Book of Rana, that means, it is written there, what the human being must do during his life on Earth and in the Book of Life is recorded, what every human being has done on Earth.

## **The Circulation of Life**

The Triune God, Creator of the heaven and Earth, acted and created a human being from His unfathomable holy will, to be alike Him, to be His image.

He projected out of Himself a part of His infinite goodness to bring to life a human being in the astral sphere.

This immaterial divine spark took upon itself a cover from the finest spiritual mass, in the sphere of the supernatural beings, that we call soul.

During permeation to the more material spheres, the cover of the soul was inefficient, however to the next evolution the soul needed a spirit which it got in the sphere of the green glare.

In the astral sphere the spark with soul and spirit took upon itself astral robes, which is a spiritual body from a very fine mass, invisible to our sight.

That is how a spiritual human was created in the astral.

He then from his own will embodied himself on our Earth, therefore exchanged his astral robes for rough bodily frame for his soul with spirit.

According to the law of reflection of all things here on Earth in the higher spheres, at the time of embodiment of the spiritual human on Earth, a picture of his soul was created in the sphere of the supernatural beings, that we shall call a primal soul of the whole mankind, because from this soul were created all souls of all people on Earth.

The first man on Earth lived in paradise and possessed many astral forces and abilities to control laws of nature, and his body also expressed nobility of mind and beauty of the soul.

However, he lost it all when he transgressed Creator's prohibition.

He lost a lot from his abilities to control, understand and direct laws of nature.

His body has adapted to this loss, the nature was brought into the inhospitable state, and aside from that, the failure of first people also bounced back into the space.

The primal soul of the first human couple was thrown down into the sphere of the green glare and in the sphere of the supernatural beings remained only its reflex.

Since that time every soul gains properties of the blood of the future creature in the sphere of the green glare from the primal soul, which we shall call the primal spirit of the mankind, instead of the remains of the primal soul, which is found in the empire of the supernatural beings.

Newly sent sparks into the descendants of the first human couple took its cover from the primal soul in the empire of the supernatural beings, which hereby became the ancestral soul.

The same occurred with the primal spirit, because from him the future generations of the first people got their properties of blood, thus a lineage.

As soon as anyone from the descendants began to form his own bloodline, a soul detached in the sphere of the supernatural beings and new stock soul was born and with this also new ancestral spirit, in the sphere of the green glare.

In this way a certain number of primal souls of stock was created, which is constant and unchanging. And from these primal souls the newly sent sparks took its cover according to which stock they were supposed to incarnate.

Thus the primal soul of the family in the sphere of the supernatural beings, acts to cover the spark which flies from the centre of the universe, however the creature gains true form of the ancestral properties from the primal spirit, in the sphere of the green glare.

After the loss of paradise, which meant for the first people sudden and different transition against previous condition, sense about God remained to them, about His commands how to live and about his promise of the Messiah.

They were able to differentiate good from evil and with their free will made decision for good or bad acts.

This spiritual bond, which existed since the beginning of the human generation on Earth, was carried from generation to generation, and this knowledge about God, our Holy Father will never disappear from the mankind, even if individuals only carried it.

Every human will receive illumination about the existence of God three times during his life on Earth, and if he wastes this, he loses his task in this life and he must be born again.

The rebirth of a human being is the fundamental principle of the life's circulation on our Earth.

The Divine spark, sent out to bring the entity on Earth to life, takes its cover from the primal soul of the stock to which it is supposed to incarnate.

After the creation of this new soul, it divides itself into two unequal parts, whereas the stronger one is designated to incarnate to the man, and the weaker to the woman.

Every part of this soul now gains its spirit independently, in the sphere of the green glare, from the common ancestral primal spirit and it incarnates itself into designated bodily frames.

After this is fulfilled and after purification of sins, each part takes off its spirit back to the primal spirit and they fuse into one unit, one soul.

It depends on each individual, whether he can achieve this in one life or not, because every creature has balance of good and evil during first incarnation on Earth, it means, that it has good and bad properties in balance and has a choice to incline its free will towards one or the other side.

If the human being does not fulfil his life's task, he must be reborn, however he no longer has balance of good and evil, because he is burdened by failures and his inability to fulfill his task in previous life.

God in His grace permitted circulation of life, in order for the human to have the possibility to return back to where he came out of, to God.

The Highest has created animals on our planet by his spirit, which according to His laws developed into the forms and species they have today.

The law of reflection of all things in higher spheres also applies to the animal creatures on our planet, therefore during rise of the first animal on Earth a primal soul of all animals was created in the astral sphere. The primal soul brings animal bodies to life, from it every animal creature gets its life impulse, and with the help of it, receives and implements instinct, which it gets. We call these suggestions instinct. These creatures act only under suggestion of the good.

Aside from these there are animal creatures, which on the contrary act only under suggestion of the evil.

These are the damned human souls, who have sinned during their life against its Creator in such a way, that they were cursed and thrown down into an animal body.

They can only act evil, because they are deprived of their soul, which waits in the astral sphere for the return of the soul from the animal body, to be united with the soul in a sphere which it earned with its acts, during its life.

The cursed creature in the animal body is aware of not being an animal, and even not knowing its offences from previous life, knows that it is forever sentenced to reside in the spheres of evil, until the Day of reckoning, when its condemnation comes into effect.

The spirit of our sun, who is a reflection of God's spirit, created and makes countless beings, which see to it that divine laws are observed exactly in our nature.

Every plant, even though the smallest and simplest one, owns a spirit who is responsible for it, that its plant will realize its purpose for which it was created on our planet.

If the plant dies, its spirit will return back into the solar spirit, however if the plant leaves seeds, its spirit will divide into the number of seeds which the mother plant produced.

Even minerals have their own spirit, which comes likewise from the solar spirit.

The guards of divine laws in minerals came into existence during separation of the planet from maternal star, because it was necessary for preservation and development of our Earth's mass.

## **Injunctions of the Order**

1. Have a firm belief in the Triune God, in your Maker, the Creator of all that is visible and invisible. Believe and do not doubt for a moment in this most holy source of all forms of life in the whole universe, where his holy will reigns.
2. Adore this king of kings, your godly father in reality and truth; honor his commandments and injunctions and follow them so that your soul can return to your father as it came from Him. Always behave with dignity, thinking on your noble origin, and worship God, your only and true ruler, enthroned by no one, not responsible to anyone, the unrestricted ruler of the universe who is Himself. Give Him the worship which belongs to Him in humility and heartfelt love. Honor the Highest Glory and give devotion and love to the only one who was, is, and will be for all ages.
3. Do not make a likeness of your Creator. God does not want such images, and your work would all be in vain because absolute immaterialness cannot be shown in matter. How can human hands imitate God when that endless God, the Light of all lights has never been seen by any person?
4. Devote the most holy name of God only in your mind. Pronounce it aloud only in the greatest mental or physical emergency. Lightly pronouncing the name of God could have weighty results for you. Do not tie this most holy name of immaterialness with non-spiritual requests.
5. God desires that Saturday should be celebrated in memory of His work. Be joyful on this sacred day but with dignity and devote a part of the day our Creator reserved for Himself to honor Him by prayer and thanksgiving for all the good He did for you during the last week.
6. Obey your parents and honor your father. In honoring your father you worship your Father in heaven because your earthly father represents your real heavenly Father. Fathers on earth be aware of your responsibility for your child's soul entrusted to your care by God. Lead it to Him by word, act, and example because it is your life's task.
7. Remember that all of humanity is a unit and that every person doing his duty well, contributes to the good of all brothers and sisters because all have one father. Therefore, do not hurt anyone in body or soul because you would hurt yourself. Do well to all your neighbors and all creation. Animals and all creation are also on earth by God's Will. Because you did not give life to anyone do not take it from anyone without necessity. Even the smallest creature has a purpose in nature.
8. Keep your body clean because it is the cover for God's spark which belongs in a clean dwelling. But remember that not only by material dirt you fail in this cleanness but much more you soil your body and mind by offences and sins. Guard, therefore, your thoughts, actions, and passions that the cover of God's spark would remain clean and not dirtied.

9. If you hear something good about your neighbor repeat the good thought around because it is pleasant to God. If you hear something bad about your neighbor, do not repeat it and try to forget the unkind story quickly. God likes this. Seek only good of your neighbor because everyone, even the apparently bad, has many good qualities. In love and humility help everyone to overcome the obstacles in life's way.
10. Do not take your neighbor's possessions. It does not matter to whom they belong. The only thing that is important is that it does not belong to you. This is a longing for material things and is dangerous for your soul because material things are implements for the powers which serve evil.
11. Calm and peace in the family are prerequisites for right living by God's laws. Do not disturb them in your heart and they will not be disturbed in your family. Mutual respect, love and complete resignation to the Will of God are the shield protecting harmony in the family circle.
12. Never disturb the conjugal life of a neighbor because it is protected by the blessing of the Most High. Lust for your neighbor's life companion is repulsive to God and it can only bring evil. Protect the sacrament of marriage and do not let it be written in your Book of Life, „adultery“.
13. Speak only the truth, clear, straightforward truth. Do not walk wrong roads because lying is a rebellion against God who is eternal and pure truth. Lying is not dignified in accordance with your origin and mission. Exert yourself that only true words come out of your mouth.
14. Have hope for mercy from your Creator. God sent you on earth to fulfill your specific task and after it is fulfilled you will be called back from this planet. You never need to exercise your will on the course of life to shorten or interrupt it. It would be a frivolous disobedience of your heavenly father who loves you so much.

## **The Human and the Sense of his Life**

The human spirit was supposed to stay in the astral for eternity and as a spiritual being serve the God.

However, because of his own decision to enter paradise, he has failed to fulfil his mission that was originally his, but God in his infinite grace and love destined human to eternal life in paradise as well.

Therefore he ate from the tree of life, but he had to deserve his eternal life by keeping absolute obedience to God and to His orders.

As he misbehaved in astral, he had to prove his will to serve God in paradise.

The only God's order was not to eat from the tree of knowledge; but the human failed even in paradise and therefore the consequences, that we already know.

From the first failure of the human couple in paradise, the man can distinguish good from evil, he knows when he makes good or evil act, and by his free will decides between good and evil.

Every human is influenced in his fight by good or evil beings, which try with various ways to regulate his life steps in this or that way.

The way he lives thinks and acts than determines about which suggestion will have greater effect on his spirit.

If the human starts his pilgrimage on our earth, he has all the possibilities, it means, that he is able to achieve salvation of his soul, that is the highest accomplishment, however he can also lose his soul and that is the most terrible outcome.

After finishing its pilgrimage on the Earth in a bodily frame, the soul returns with spirit into the sphere predestined to it by its living performance in the last incarnation and if all life tasks were fulfilled, there is no need for a rebirth.

If it fails to accomplish, it must be born again and into those circumstances, which were created in a previous life.

The rebirth is however an immense grace of our Creator, because the chance to correct its mistakes and failures in the next incarnation is not always given to the man.

Therefore it is necessary with all one's might and efforts to realize its task as soon as possible, to clean its inward nature and to achieve salvation of its own soul.

The thoughts and behaviour of a human, his life here on the Earth, are deciding factors for the assessment of the soul of each human and the sense of our life is to suppress all evil thoughts, act well only and to lead a life dedicated to God by observance of his orders.

The most effective weapon in the fight of good with evil is love and humility and the most reliable shield to ward off attack of evil is patience and lenience.

Anger, opposite of lenience, is a great sin, because out of it arise many other sins and it can grow into hate, which is the most destructive force of human soul, because it is an opposite of love and without it the human soul cannot achieve the desirable goal to rise to the occasion and unite with God.

As a result of the human failure in paradise, the human is burdened by imperfect bodily senses, which are very often used wrongly, it means, for the satisfaction of his passions and vices.

Our bodily senses are supposed to invigorate our bodily frame in order for our spirit, due to its means, serve our Creator in a better way.

Therefore it is necessary to stop everything that harms our body, be it passions, falseness or careless use of our bodily frame, and it is a duty of each human to take care of his body in a way it deserves.

However, the overdone and excessive care intended for the purpose to impress other people is also harmful in all the ways.

God commanded to each human what he must accomplish during his life in a bodily frame on the Earth.

God also destined to every human trials and sufferings, which he must pass through in order to demonstrate and prove that he is worth the salvation.

Heartfelt and persistent prayer to our heavenly father will give us strength for submissive and patient tolerance and negotiation of life's difficulties and for an attainment of spiritual harmony, which is a condition of successful fulfillment of life's task.

To the first man on the Earth, God gave a helper for the fulfillment of tasks and she remained to him even after the expulsion from paradise, and so the man and woman are even today predestined to cooperate and fulfill tasks here on the Earth.

The man, who owns a bigger part of the divided soul and therefore also greater spiritual abilities, is a direct bearer and an executor of God's will on the Earth.

Blessing and grace from our Highest is transferred from a man onto a woman and the descendants, because the man is responsible for their correct guidance on their way to God.

Woman, because she is a man's complement and therefore with minor spiritual power, is men's aid in the accomplishment of his life's tasks.

If a man and a woman are God's choice to be a tool for the conception of a descendant, they give to a new being characteristic traits of their clan, because the family's blood is the determining factor.

The new being takes his spirit from the same primal spirit from whom his parents received theirs.

Only the sons can continue their stock, because the daughters are predestined to fuse with another family.

However, every descendant of either sex is a grace and blessing of the Highest, and if the parents wish to fulfill their mission, it is necessary to realize this to a full extent and lead their life and that of the descendants accordingly, so that the grace of God does not change into a rightful punishment.

By filling life's task, we try to reach the final destination of our living here on the Earth, and that is: to get rid of all unfavorable influences on our bodily frame as much as possible and to give the greatest chance to the Godly Spark in us to affect our thinking and performance and by it purge our soul to a point, where there is no further need for it to be born again.

Even if we don't know exactly the duties which we must perform during our life, we know the way of living, which will lead us safely through the life's pitfalls.

It is a firm belief and devotion to God, strict observance of His orders and zealous doing of good acts.

This way is not easy, and it is necessary to put a lot of effort in it and proof ourselves, because this is a fight of good with evil and this fight takes place not only here on the Earth, but in all of the Universe as well.

And by this fight arise merits of creatures and beings, and the fighters of God's lines are hardened by life, as in the earthly world, so in the unearthly world.

Every human being is predestined for salvation of his soul by God, it means, that everybody has in the most fairest way all the opportunities to reach what is predestined.

It does not mean that salvation of soul is assured, though, because many and many people fall under the temptation of evil, and indulge in sinful pleasures of material body and of the world, so that all the influence and inspiration of goodness is lost.

Such a human often creates insurmountable obstacles on his way to salvation and then walks on a wide and comfortable way of vices and passions.

By this he creates even worse conditions for the salvation of his soul in his next life and must therefore suffer in the spheres, where evil reigns and where he cannot do any good acts.

## **Coexistence of People on the Earth**

The whole mankind forms one unit because it has one father, Creator of all life and lifeless matter, almighty God; and that it has a collective target and goal in life, to return to its Creator, to its primal substance. Each individual, without exception, participates in this task by his actions and with his effort contributes not only to the salvation of his soul, but also

helps and strengthens his fellow men, who are witnesses of his efforts to lead a life dedicated to God.

When the man is determined to devote his life to his father, to God, it is not necessary to live separately from the whole, as a recluse. However, it is necessary that his heart remains pure and his behavior radiates with dignity and that his thoughts always originate from our Creator, no matter what he will do.

A big danger for each individual is a hunger for material possession, because it is used most frequently by evil for the seduction to a way of darkness. It is necessary to be always aware of this danger and therefore see material possession as a necessity to life and own it only in a limited quantity. The hunger for material possession must never dominate to a degree, where our activity and acts are fully or even partially influenced by this longing.

After days of successful work, be it spiritual or physical, it is allowed to celebrate in any way one likes; only minimal amount of alcohol should be used as an instrument for the amusement.

Every human being is responsible to God for purity of his soul and the man in a family is also responsible for correct leadership of his wife and his descendants to belief in God and observance of His orders. By own example, with love and patience, it is necessary to heighten the spirit of entrusted beings to our heavenly Father and to teach them to live a dignified life, that mirrors our noble divine origin and mission.

Woman is a man's support in the fulfillment of his tasks, both worldly and spiritual. When the man breaks down by tiredness or mind despair, it is woman's task to strengthen his spirit and thereby help him to carry on and to regain his strength. The woman protects man from failures by her love and self-sacrifice and her tears purify innumerable stains on the astral robe of man. She must do it because the blessing of our Lord is passed onto the woman through the man, that means, the higher the man's spiritual level, the greater blessing she receives.

The God's blessing, that is foremost peace and tranquility in the heart of man and woman and thereby in the family and then satisfaction and true love, which only tries to give without expecting anything in return. Peace in the family is not a matter of fact, but it is grace, which only very few people fully appreciate. Worries of profane character are narrow-minded obstruction in gaining this grace, when trust and devotion in God is solidly grounded in the hearts of man and woman.

If the man with his woman both try to live according to the orders of the Highest and do good acts as much as possible, so does their family live in harmony with God's will. If this harmony is apparent in all the families, the whole nation lives according to the divine laws of love and peace. If the man saves his soul, he does not need to be born again and after cleansing any remnants of materialism, he can reach the desired top – unity with God. If the will of all people, that means of all nations on the whole Earth, will be identical with the will of our Creator, then only one characteristic will remain in the hearts of all people, namely love that will mean the salvation of all mankind, cancellation of the rebirth law and return to its primal substance, to God.

Therefore it is desirable for the successful development of every man's heart to nourish love, pure and unselfish love, which does not differentiate between people and the strength and light of our heavenly Father will radiate from each of us and make the evil helpless and handcuffed and thrown down to the lowest spheres.

## **The last judgment**

In the endless space of the Universe, there is continuous formation and extinction of the material orbs, which fall under the law of time in a same way as our Earth.

Every man is transient and limited by time; only the Spark in us is endless and eternal, same as the Creator.

During our lives in the material body, we try, one more, the other less, to achieve purification of our soul in order to prepare ourselves for the return to our spiritual primal substance, and for us the rebirth makes it possible to amend our lapses and sins.

At the end of life in a body on the Earth, our soul is assessed according to its acts on the Earth.

We then find out how we took the best advantage of our possibility to elevate our soul and the hope remains for the grace of our Highest, that he will allow next incarnation for redemption.

However, the time will eventually come when our Creator will end the cycle of life and will evaluate with final validity our acts and achievements, and we will be rewarded according to our merits.

It is the last judgment, during which all those alive and the lifeless will have to answer in front of their Creator, how each of them fulfilled their mission for which they were created.

Nobody knows when the last judgment will be, only God Father alone, because His holy and unfathomable will shall determine the time, when according to His highest justice, it will be decided between good and evil.

The coalition of mass on which we live and which surrounds us will be destroyed with everything found on it, by a fire.

A new coalition with new laws will be created for those who will proof themselves in front of the Highest.

Those who will fail will be forever condemned to stay in a place where only evil reigns and they will never see the light of their Creator.

God is our Father and it is love and we are all His children, therefore we must hasten our way with pure heart of a happy being, to the Creator.
